Read Me

What's Included

- Semester module database tracking credits, professors, and class schedules
- Weekly assignment deadline board prioritizing deliverables by urgency
- Structured lecture notes capture framework with active recall sections
- Focus session tracker designed to eliminate digital study distractions

Intended For

College and university students managing multiple academic modules and deadlines.

What's Included

- ✓Semester module database tracking credits, professors, and class schedules

- ✓Weekly assignment deadline board prioritizing deliverables by urgency
- ✓Structured lecture notes capture framework with active recall sections
- ✓Focus session tracker designed to eliminate digital study distractions

Intended For

College and university students managing multiple academic modules and deadlines.

Academic Workflow Architecture

Balancing coursework, college laboratory assignments, and personal skill development requires a systematic tracking system. Rather than keeping deadlines in your head or fragmented across chat apps, this tracker establishes a single source of truth for your semester.

> *Structure liberates creativity. When your deadlines are managed systematically, you have mental bandwidth to actually learn. — Academic workflow principle*

Weekly Planning Cadence

- Sunday Planning Session (20 minutes): Review upcoming assignment deliverables and lecture schedules.
- Daily 3-Priority Rule: Define only three major academic objectives per morning.
- Mid-Week Buffer Block: Allocate 90 minutes on Wednesdays to absorb overflow or difficult lab reports.
- Friday Reflection & Archiving: File completed assignment documents and update progress status.

Module Deliverable	Urgency Tier	Preparation Window	Review Checklist
Laboratory Report / Practical	High (Weekly)	2 days prior to lab	Code compile check & outputs
Mid-Term Coursework Essay	Medium (Monthly)	10 days prior	Reference citation & outline
Final Capstone Project	High (Ongoing)	Weekly sprint reviews	Git commits & documentation
Self-Study / External Skills	Continuous	1 hour daily block	Project implementation

Beware Deadline Compression

Never schedule final submission uploads within 1 hour of university portal closing. Server congestion and ISP drops frequently cause unsubmitted penalties.
